// WORK EXPERIENCE

Co-Founder and CTO PeakD

2021 – PRESENT

Founded PeakD to build community-owned Web3 products that make decentralized tech feel human.

- Leading product strategy and engineering for Web3 social and gaming apps.
- Designing decentralized architectures that keep ownership with the community.
- Driving roadmap decisions that turn blockchain complexity into real user value.

Competence Lead Klarna

2020 – 2021

Worked in the core banking domain to build a functional platform that can easily be integrated by internal and external customers.

Team Lead / CTO CST Tech

2016 – 2020

Modernized CST Tech's platform and architecture while shipping fintech products at scale.

- Rebuilt core framework to scale and support multiple products.
- Delivered financial analytics and regulatory products for fintech clients.
- Replaced legacy SQL stacks with a modern big-data pipeline.

Software Engineer / Architect Reply

2006 – 2015

Built telecom billing and rating platforms.

- Architecture design for high-throughput rating, billing, and BPM-driven order management systems.
- End-to-end billing solutions and automated telecom workflows.
- Secure integrations and unified business views across systems.
- Wholesale order management workflows that navigated complex partner ecosystems.
